2. Claims 1-15, 18-20, 22, and 34-39 are pending.

Art Unit: 2134

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claim 1 rejected under 35 U.S.C. 102(b) as being anticipated by Patent No.

5,153,919, Reeds, III et al for the reasons given in the vacated final office action.

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 2-7, 35 rejected under 35 U.S.C. 103(a) as being unpatentable over Patent No. 6094485, Weinstein et al. in view of Patent No 6675216, Quatrano et al. for the reasons given in the vacated final office action.

11. Claims 36-37 rejected under 35 U.S.C. 103(a) as being unpatentable over Patent No. 6094485, Weinstein et al. in view of Patent No 6675216, Quatrano et al. in further view of Patent No. 6681327, Jardin for the reasons given in the vacated final office action.

Response to Arguments

13. Applicant's arguments filed on page 8, dated 4-30-2004 has been fully considered but they are not persuasive.

14. Regarding claim 1, applicant contests that a provisioning server that there is not teaching for authenticating the base station. This examiner respectfully disagrees. See the newly formed rejection above. It can be said that the a mutual authentication takes place between the mobile unit and the base station (Reeds 111, col. 8, line 50-68), where both units authenticate each other by challenge/response steps. Furthermore, applicant contests on page 9 that a cryptographic key is cannot be asserted from the authentication string sited in Reed 111. The independent merely states "cryptographic

key associated with the user" which authentication string (Reeds 111, col. 5, line 60-61, col. 6, line 7-10) shows. The authentication string is hashed/encrypted to produce SSD (shared secret data, Reeds III, Col. 6, line 1 1-12) which is used to encryption of some signaling message (SSD-B, Reeds 111, col. 6, line 14- 18). Thusly the rejections stand.

15. Applicant's arguments with respect to claim 12-20, 22 have been considered but are moot in view of the new grounds of rejection.

Conclusion

16. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
